NOTE: This data represents individuals who were served by Title V programs during FFY ending 9/30/2007. Participants who have benefited by more than one program may be counted more than once since there is no mechanism to provide unduplicated counts across programs. Counts on Form 7 will not match Form 8 data which is based, in large part, on Vital Statistics CY2006 data.

"Others" served represent programs that serve non-pregnant women and adults age 22 years and older. Future efforts will be made to identify more specific demographic characteristics of the persons counted in the "Others" category.

Source: CTDPH, Vital Statistics "Infants" represent live births CY2006. "Deliveries" also includes fetal deaths for all but Title XIX who do not have access to this data. "Eligible Title XIX" represent FFY2007 counts (Eligible Title XIX counts were extrapolated from 2006 counts). "Title V Served" includes the universe of CT deliveries and births thru our Universal Newborn Screening programs.

Note: Counts of CT births may vary throughout this report depending on a) whether just resident or all occurrent births are included; b) whether the count is reduced based on missing data for another variable associated with the birth e.g. race, prenatal care, birth weight etc., as well as c) timing of the count e.g. how complete the data are at the time.

CTDSS was not able to provide detailed Hispanic subcategories for this report.

TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT
STATE PROFILE FOR FY 2009
[SEC. 506(A)(1)]
STATE: CT

1. State MCH Administration:
(max 2500 characters)

1. State MCH Administration: (max 2500 characters) The CT Department of Public Health (DPH), the state's leader in public health policy and advocacy, is the agency which administers Connecticut's Title V Maternal and Child Health Services Block Grant. Title V funding allows the state to address the health concerns of the Maternal and Child population (including women during the interconceptional period, and men) throughout the state through community-based programs and interventions. These programs include Perinatal Case Management Programs (i.e., state Healthy Start), Early Hearing, Detection and Intervention Universal (Newborn Hearing Screening), Children and Youth with Special Health Care Needs (CYSHCN) and School Based Health Centers (SBHC). These programs address the health needs of the three maternal and child population groups. Additionally, state capacity supported by Title V funding allows for ongoing assessment, planning, evaluation and policy-making activities regarding the state's MCH population, whether it be within the department, between state agencies, or in collaboration with other MCH organizations and community partners.

b. Infants < 1 year old	41,722
c. Children 1 to 22 years old	142,752
d. CSHCN	33,140
e. Others	178,477

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:
(max 2500 characters)

The state CYSHCN program has successfully transitioned from a regional center model to a community based, medical home approach. To date there are 26 pediatric practices that provide care coordination including enhancing access to: specialty and subspecialty services, durable medical equipment, medication prescriptions and specialized formulas for children with special needs. Care Coordinators are co-located in some of the pediatric practices. The CYSHCN program also provides funding for respite and family support services and works closely with the Family Support Council. School-Based Health Centers (SBHCs) in Connecticut enhance access to health care services for students, especially those most in need, by providing these services in the school setting. School-Based Health Centers provide a wide range of health care services, including dental, mental health, and social services through an interdisciplinary team. As a major safety net provider, SBHCs are an important source of health care for thousands of uninsured and underinsured children and youth in the state.

b. Population-Based Services:
(max 2500 characters)

The Early Hearing Detection and Intervention Program (EHDI) screens all newborns delivered in CT for hearing impairments and refers them as needed to the audiology centers for follow-up and treatment. Newborns are referred to the CT Birth to Three System as appropriate. The Newborn Genetic & Laboratory Screening Program is a population-based initiative that screens all newborns delivered in CT for the diseases as listed in the State Supporting Document section, CT Newborn Screening Program Screened Disorders. Infants with positive screening results are referred for confirmation testing, counseling, education, and treatment services. The program provides increased public health awareness of genetic disorders, public health education, and referrals. The Department has developed a Memorandum of Agreement with the University of Connecticut to implement a statewide fetal and infant mortality surveillance program. The contractor will work with community-based organizations and providers to address issues that have been identified as a result of the surveillance process. A ten-year report (1991-2000) for the Pregnancy Related Mortality Surveillance was released this year.

c. Infrastructure Building Services:
(max 2500 characters)

DPH is working towards creating a data warehouse of high-quality linked child health data, which has been titled HIP-Kids (Health Informatics Profile for CT Kids). Implementation will progress using the three-year technical strategic plan. Effective decision-making requires timely and useful data on maternal and child health. The information from HIP-Kids will be an important data source to enhance DPH's ability to report on performance measures, as well as other required outcome measures. DPH staff collaborated to adopt a plan that would create a data warehouse of high-quality linked child health data. Eleven state-mandated databases within DPH contain record-level health data on children, and the HIP-Kids project will combine data from these disparate databases into a single data system. During this time period, child health data from three disparate databases are linked (newborn hearing screening results, metabolic screening and birth records). DPH, with MCHB technical assistance support, worked collaboratively with the Hartford Health Department to develop an Action Plan for addressing preconception care in the City of Hartford. This has provided a springboard for ongoing collaborations with the HHD and the Federal New Haven Healthy Start Program, and will be disseminated for possible replication in other communities. TA funds were also used to collaborate with CT Kids As Self Advocates (KASA) to sponsor a day-long workshop on transitioning for CYSHCN. This year TA funds will be used to develop a curriculum for men regarding supportive services during a woman's pregnancy. This activity is consistent with the recommendations from the State Perinatal Plan, the FHS'

strategic plan for addressing low birth weight, the HHD's Action Plan.,and the Department of Social Service's Responsible Fatherhood federal grant. The DPH collaborated with the CT Coalition to End Homlessnessto conduct a point-in time survey of homeless persons in CT. This data will be used in CT's upcoming MCH five-year needs assessment. DPH is participating in a multiti- interagency collaboration to provide training to professionals at CHCs and WIC sites who can then train parents on soothing techniques to prevent Shaken Baby Syndrome.

1. **Section Number:** Performance Measure #5

Field Name: PM05

Row Name:

Column Name:

Year: 2007

Field Note:

Indicator data comes from the National Survey of CSHCN, conducted by HRSA and CDC, 2005-2006. Compared to the 2001 CSHCN survey, there were revisions to the wording, ordering and the number of the questions used to generate the NPM05 indicator for the 2005-2006 CSHCN survey. The data for the two surveys are not comparable for PM #05.

Field Name: PM06

Row Name:

Column Name:

Year: 2007

Field Note:

Indicator data comes from the National Survey of CSHCN, conducted by HRSA and CDC, 2005-2006. Compared to the 2001 CSHCN survey, there were wording changes, skip pattern revisions, and additions to the questions used to generate the NPM06 indicator for the 2005-2006 CSHCN survey. There were also issues around the reliability of the 2001 data because of the sample size. The data for the two surveys are not comparable for PM #06 and the 2005-2006 may be considered baseline data. Adjustments to the annual performance objectives were made for 2008-2012 because of the wording changes to this measure. Adjustments used CT's 2007 figure which is higher than the national % for this measure.

Column Name:

Year: 2006

Field Note:

Source: The NIS survey measurement changed in 2005 to capture varicella (chicken pox vaccine coverage). In 2005, for Immunization Performance measure, we still reported data from the NIS survey for the 4:3:1:3:3 coverage rate (4 DTap, 3 Polio, 1MMR, 3 Hib and 3 Hep B). In 2006, the benchmark for childhood immunization coverage that the National immunization Survey (NIS) measured added varicella vaccine to the list of vaccines. The 2006 benchmark became 4:3:1:3:3:1 with inclusion of varicella to the series. The addition of varicella resulted in a drop off in coverage rates. However based on this new standard, CT nationally still ranked 3rd in the country last year among all fifty states.

There is no indication that family fears regarding vaccines and autism has had any impact on these coverage rates.

Note: The Annual Performance Objectives were updated beginning with 2008 based on the more recent data. There was a private regional survey conducted in NW CT this past year (2005) including 8 of our 169 towns. Data showed 47.5% of 3rd graders had received dental sealants. It should be noted that these towns were: a) more affluent than the rest of the state with a Per Capita Income(PCI) of \$36, 370 vs.\$28,766 for the state, and b) less diverse with only 3.4% non-white vs. 18.4% for CT as a whole.

The prior/retired breastfeeding measure NPM 11 monitored breastfeeding rates at hospital discharge. As of June 2007, CDC's National Immunization Survey results present estimated breastfeeding rates according to the year of the child's birth to facilitate the evaluation of breastfeeding interventions and progress toward the Healthy People 2010 breastfeeding objectives.

Prior to June 2007, CDC presented this breastfeeding information by year of respondent interview as given in the current table.

CT's revised rates using the new methodology as of June 2007 are 40.8% for 2003 and 44.6% for 2004. Using this more recent data, annual performance objectives should be 45.0 for 2005, 46.0 for 2006 and 47.0 for 2007.

Annual performance objectives for 2008-2012 have been updated accordingly.

Note: The 2005 column in last year's application was based on the removal of data where prenatal care and tobacco use in the third trimester was unknown. The calculations reported a numerator of 89 and a denominator of 41,086 resulting in an annual indicator of 0.2%. This column is locked and so these updates are not possible to this form.

The 2006 annual indicator data shows a dramatic decrease in the death rate for this year. Data were re-checked with Vital Statistics who confirmed these figures. A comparison of 2005 and 2006 age sub-groups 1-4, 5-9 and 10-14 years showed a decrease of about one-third in each of these 3 age groups from 2005 to 2006. Further analysis would be needed to determine the causes of death or other characteristics that accounted for the decrease in 2006.

The Annual Performance Objective for 2006 field is locked by the form and not available to change based on our most recent data. If we could we would adjust next year's goal to a more reasonable 13.4 based on current info. with the projections improving from that point forward.

LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: CT FY: 2009

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Strengthen Data Collection and Reporting
2. Establish Collaborative Relations at the State/Local level
3. Reduce Intentional Injuries
4. Improve Adolescent Health Status
5. Promote Nutrition and Exercise to Reduce Obesity
6. Increase Access to Pre-conception Education and Parenting
7. Promote access to family support services including respite care and medical home system of care for Children and Youth with Special Health Care Needs
8. Reduce health disparities especially related to Access to care, Racial/ethnicity, Geographic location (Specific issues: teen pregnancy, low birthweight, prenatal care, breastfeeding, and infant mortality)
9. Collaborate with the other federal Region I states to develop indicators that measure the collective assets of their early childhood health systems, "specifically focusing on their collective assets regarding child care health consultants (CCHC)."

STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: CT

SP # 1

PERFORMANCE MEASURE:

Cumulative number of datasets incorporated into integrated warehouse (called HIP-KIDS).

STATUS:

Active

GOAL

The creation of a data warehouse containing a comprehensive child health profile by linking disparate databases into a single comprehensive system, to use as a resource to enhance public health assurance and assessment activities within Connecticut, and also to inform public health policy.

DEFINITION

Number of databases integrated into HIP-KIDS beginning with a core targetted set of seven (7) databases.

Numerator:

Cumulative number of databases integrated into HIP-KIDS at the end of the current year.

Denominator:

Total number of core databases (7) identified for HIP-KIDS.

Units: 7 **Text:** Scale

HEALTHY PEOPLE 2010 OBJECTIVE

23-11. (Developmental) Performance standards for essential public health services.

DATA SOURCES AND DATA ISSUES

The extent to which databases are incorporated into an integrated warehouse will be measured by the progress of the HIP-KIDS project. The seven core databases to be linked are: Newborn Laboratory Screening, Newborn Hearing Screening, CYSHCN Registry, Birth Defects Registry, Birth Records, Death Records, and the Immunization Registry.

SIGNIFICANCE

Databases containing child health data are housed in different areas of the agency. These data are not currently linked and are analyzed in isolation of one another, thus limiting essential public health functions. An electronic mechanism that creates a single comprehensive profile of child health is needed. This resource will support interdivisional public health research activities and initiatives. HIP-KIDS, a Health Informatics Profile of Connecticut Children, will greatly enhance public health assurance and assessment activities within Connecticut, and will also inform public health policy.

PERFORMANCE MEASURE:

Cumulative number of formal agreements, in the format of Memoranda of Agreements (MOA's) and collaborative agreements, that serve the needs of the three MCH populations.

STATUS:

Active

GOAL

The MCH Program proposes to collaborate and coordinate with state and local stakeholders committed to improving the health of women and children.

DEFINITION

The cumulative number of formal agreements between DPH and state/local partners to serve the needs of each of the three MCH population groups as tallied at the end of each year.

Numerator:

This measure is a count not a percentage, therefore no definition of a numerator and denominator is provided.

Denominator:

HEALTHY PEOPLE 2010 OBJECTIVE

The following 2010 Objectives relate to the overall goal of the State Performance Measure: 1-5. Usual primary care provider. 1-6. Difficulties or delays in obtaining needed health care. 16-6. Early and adequate prenatal care. 16-22. (Developmental) Access to medical home for CSHCN. 16-23. Service systems for CSHCN. 18-6. (Developmental) Mental health screening. 18-7. (Developmental) Treatment for children with mental health problems. 18-9. Treatment for adults with mental disorders.

21-2. Untreated dental decay. 21-10. Use of oral health care system. 21-12. Preventive dental services to low-income children and adolescents. 21-13. (Developmental) School-based health centers with an oral health component. 21-14. Oral health component to local health departments and community-based health centers.

Documented formal agreements reported by Title V programs in each of the three MCH population groups.

DATA SOURCES AND DATA ISSUES

SIGNIFICANCE

The MCH Program acknowledges that improving the health and well-being of women and children requires a collaborative response from state agencies and community providers. No one agency alone is able to address the complex health and social service needs of these vulnerable populations. For this reason, the MCH Program proposes to collaborate and coordinate with state and local stakeholders committed to improving the health of women and children. Specific issues best addressed through collaborations with state and local partners include: increasing access to needed services such as mental health, oral health, specialty care and health services in rural communities, and expanding access to health insurance for low income populations.

SP # 3

PERFORMANCE MEASURE:

Percent of 9-12 graders who reported being in a fight within the past 12 months.

STATUS:

Active

GOAL

To reduce the number of injuries to adolescents in grades 9-12 due to violence and intentional injury.

DEFINITION

Participation in a fight by students in grades 9-12.

Numerator:

Number of students in grades 9-12 who report being in a fight within the past 12 months.

Denominator:

Number of students in grades 9-12 completing the CT School Health Survey, [a bi-annual survey combining YRBS (formerly known as the Youth Risk Behavior Survey) and the YTS (Youth Tobacco Survey)].

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

15-12. Injury-related hospital ED visits. 15-37. Physical assaults. 15-38. Physical fighting among adolescents.

DATA SOURCES AND DATA ISSUES

CT School Health Survey (previously known as the YRBS) in years 2007 and 2009. Progress in other years will rely on narrative reports from the Title V programs related to health education and intervention activities completed by Title V programs to reduce intentional injuries to the adolescent population.

SIGNIFICANCE

The increase in violence and intentional injuries poses a serious public health threat to the adolescent population. Participation in fights is one marker of violent behavior that often results in serious injuries. Efforts to decrease violent behavior will help reduce intentional injuries to adolescents. Data will be reviewed by race and ethnicity, as well, to determine sub-populations possibly experiencing more violence.

SP # 4

PERFORMANCE MEASURE:

Percent increase in the number of adolescents 10-20 years old who receive services in school based health centers.

STATUS:

Active

GOAL

To increase access to age-appropriate services for adolescents 10-20 years.

DEFINITION

Percent increase of adolescents 10-20 years who received services in school based health centers (SBHCs) in the current year compared to the base year.

Numerator:

[Number of adolescents 10-20 years receiving services in SBHCs at the end of the current year – Number of adolescents 10-20 years receiving services in the base year].

Denominator:

Number of adolescents 10-20 years receiving SBHC services in the base year.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

1-4b Source of ongoing care (Children and youth aged 17 years and under).

DATA SOURCES AND DATA ISSUES

Annual data reported by DPH-funded School Based Health Centers on number of students receiving services.

SIGNIFICANCE

Adolescents of diverse racial and ethnic backgrounds and low socioeconomic status living in rural communities are at increased risk for unintentional injuries, substance abuse, and mental health problems. The need for age-appropriate services for adolescents is often unmet due to the gap between pediatric and adult medical care services. Currently, school-based health centers are only reaching a portion of adolescents in CT because SBHCs are funded in a select number of schools. An additional subpopulation of adolescents is not reached because they are incarcerated, have dropped out of school or are migrant workers. Efforts to increase utilization of services offered by SBHCs will help meet and improve the health status of adolescents.

SP # 5

PERFORMANCE MEASURE:

Percent of schools that have used a program to reduce obesity through physical exercise and nutrition education programs.

STATUS:

Active

GOAL

To reduce overweight/obesity in the child and adolescent population.

DEFINITION

The percent of schools in CT using an educational program to reduce obesity through physical exercise and nutrition education.

Numerator:

Number of public schools using an educational program to reduce obesity through the promotion of physical activity and nutrition education.

Denominator:

Total number of public schools.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

7-2. School health education. 7-2h. Unhealthy dietary patterns. 7-2i. Inadequate physical activity. 19-3. Overweight or obesity in children and adolescents. 19-3a. Children aged 6-11 years. 19-3b. Adolescents 12-19 years. 19-3c. Children and adolescents aged 6-19 years. 22-8. Physical education requirements in schools.

DATA SOURCES AND DATA ISSUES

Data summaries from the State Department of Education related to school nutrition education and physical exercise programs to reduce obesity.

SIGNIFICANCE

Overweight and obesity have been increasing in children and adolescents, and are associated with poor health outcomes such as heart disease and Type II diabetes. For these reasons, this preventable condition has emerged as a top public health priority in CT. A formal exercise and nutrition program in schools will begin to address the problem by educating students and parents about healthy eating and promoting exercise through the Coordinated School Health Model.

SP # 6

PERFORMANCE MEASURE:

Percent of infants born to women under 20 years of age receiving prenatal care in the first trimester

STATUS:

Active

GOAL

To increase young women's access to preconception counseling and parenting education.

DEFINITION

Percent of mothers less than 20 years of age receiving prenatal care during the first trimester.

Numerator:

Number of women less than 20 years of age who received prenatal care during the first trimester of pregnancy.

Denominator:

Number of births to women less than 20 years of age.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

16-6. Prenatal care. 16-6a. Care beginning in the first trimester of pregnancy. 16-6b. Early and adequate prenatal care.

DATA SOURCES AND DATA ISSUES

CT Department of Public Health, Vital Records.

SIGNIFICANCE

There are disparities in many of the key health indicators among teens and minority populations compared to the adult population and White non-Hispanics. Lack of proper preconception counseling, parent education, and other parenting supports among minority and teen populations contributes to the disparate outcomes. Receipt of early prenatal care is one way to provide necessary medical and counseling services to improve birth outcomes and to educate women on other topics such as parenting and future pregnancies.

SP # 7

PERFORMANCE MEASURE:

Percent of CYSHCN who receive family-centered,community-based, culturally-competent,comprehensive, coordinated family/caregiver support svcs incl. respite in the Regional Medical Home System of Care

STATUS:

Active

GOAL

To increase access to DPH funded family-centered,community-based,culturally-competent,comprehensive and coordinated family/caregiver support services including respite care in the Regional Medical Home System of Care for CYSHCN.

DEFINITION

The percent of CYSHCN who receive needed family-centered, community-based, culturally competent, comprehensive and coordinated family/caregiver support services including respite from DPH funded programs.

Numerator:

The number of CYSHCN receiving care coordination activities including resource coordination, benefits coordination, transition services, education support, and community-based resources including respite from DPH funded programs.

Denominator:

The total number of CYSHCN to be served who indicate their need for family/caregiver support services including respite from DPH funded programs.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

1-6. Difficulties or delays in obtaining needed health care.16-22. (Developmental) Medical homes for CSHCN. 16-23. Service systems for CSHCN.

DATA SOURCES AND DATA ISSUES

Medical home data collection system (DocSite).

SIGNIFICANCE

Data estimates gathered by CT MCH staff show that there are approximately 93,500 children and youth with special health care needs living in Connecticut. Many of these children and their families struggle everyday to identify and access family-centered, community-based, culturally-competent, comprehensive, and coordinated family support services that they need. Family/caregiver support services are whatever is needed for families/caregivers to thrive within their community. Care coordination, benefits coordination, transition services, educational supports, and community-based resources including respite care are just a few of the services these families/caregivers need and often have trouble accessing in adequate amounts. Through the Regional Medical Home System of Care, great strides have been made to identify and serve families/caregivers with CYSHCN in the state,in collaboration with their Medical Home or the primary pediatric care provider, but there are still many families/caregivers who struggle. Efforts need to be made to 1) improve access to family-centered, community-based, culturally-competent, comprehensive and coordinated family/caregiver support including respite care, 2) increase the overall service capacity and the resources available for this support and respite care, and 3) support families/caregivers who have trouble identifying these supports including respite providers.

SP # 8

PERFORMANCE MEASURE:

Percent of licensed child care centers serving children age birth to five who have on-site health consultation, as defined by the standards in "Caring for Our Children".

STATUS:

Active

GOAL

To increase the number of center-based facilities serving children age birth to five who have on-site consultation by a health professional with the appropriate level of knowledge and skills in child health and safety.

DEFINITION

Percent of licensed child care centers serving children age birth to five who have on-site health consultation, as defined by the standards in "Caring for Our Children".

Numerator:

Percent of licensed child care centers serving children from birth to age five ("Child Day Care Centers" per CT regulation) with a confirmed health consultation log as indicated on the inspection forms performed during the given year, thus confirming that a Child Care Health Consultant has provided services to that center.

Denominator:

The number of licensed child care centers serving children from birth to age five receiving an inspection visit in the given year.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

CT DPH's Day Care Licensing Section conducts site visits of "Child Day Care Centers" defined per CT regulation every other year. The inspection documents that the day care center has the required health consultation log indicating that a Child Care Health Consultant has provided services to that center.

SIGNIFICANCE

As the number of children age birth to six years in out-of-home care has increased from 30% to over 76% since the 1970's, it has become increasingly important to be able to evaluate programs, to assess quality, accessibility, and the impact of care on children's health. Child care health consultants play a critical role in promoting healthy and safe child care environments and supporting education for children, their families, and child care providers. This support specifically includes children with special health care needs. Child day care health consultants also improve access to preventive health services such as medical and dental homes, early intervention and family support. This measure is consistent with recommendations from the AAP, APHA and MCHB/HRSA.

HEALTH STATUS INDICATOR MEASURE # 04B

The rate per 100,000 of nonfatal injuries due to motor vehicle crashes among children aged 14 years and younger.

	2003	2004	Annual Indicator Data		
			2005	2006	2007
Annual Indicator	24.0	22.7	22.4	18.3	
Numerator	175	155	153	122	
Denominator	729,316	682,998	682,998	665,901	

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.
